Re: Letter of Referral for Volt Tech Electric

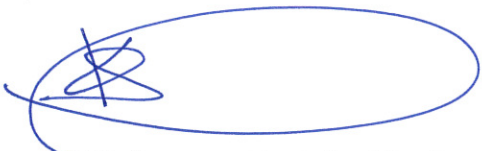

To whom it may concern:

As a General Contractor, we have been working with Volt Tech Electrical Services since 2007. Volt Tech has worked on a variety of jobs ranging from a large scale custom residential home to various commercial tenant improvements. They have proved to be a key member of our team on these projects.

It is worth noting our experience with Volt Tech on the large scale custom home project. This particular job was challenging on several fronts; its scale was significant and its design was state of the art. Under this demanding environment the project lead, Jeremy, and all his crew not only met expectations but emerged as an invaluable asset to the project team.

The entire organization, from Jason to the field apprentices, provides responsive service, a cooperative team approach and expert technical skills. Volt Tech remains our preferred Electrician in the greater Seattle area.

Respectfully Submitted,

Keith Hammer, Managing Director
